## TDIG Closing remarks

- Convergence towards a model:
  - PhotDM is in the process of being DMLized
  - Characterisation in starting to be also DMLized
- Different serialisations VODML-Lite & utype
  - For the next interop I think the TDIG should concentrate on the practical usage by clients
- A proposal for a TIMESYS element in VOTable
  - Work with Apps to add element to VOTable
  - Work with Semantics to set-up the needed vocabulary
  - Work with data providers towards implementations
