

Semantics WG in Heidelberg

Norman Gray, Mireille Louys

Friday wrap-up, Heidelberg, 2013 May 17

- There was no semantics-only session
- Useful coffee-time feedback on VOUnits
- ...and on new UCDs (planetary science)
- DCP/Semantics joint business: UAT (Alberto)

Kites flown, Visions had

- RDFa/microformats (Sébastien Derrière): using JavaScript to add functionality using HTML contents
- Gaia technological challenges (Juan Gonzalez): when must we go beyond RDBMS?
- Annotation, paper-claiming and ORCID (Alberto Accomazzi): multiple opportunities to enrich services

- SPDY (Paul Harrison): Google interestingly smart
- Reasoning in bioinformatics (Matthew Graham): biologists' computers interestingly smart
- Databases on SSD (Mark Holliman): deploying on SSDs requires more smarts than you'd guess
