

IVOA Data Model

Opening @Hawaii, 2013
Jesús Salgado, Omar Laurino

2 DM Sessions + 1 DAL/DM

- Two sessions scheduled for this interop:
 - Ongoing Data Models (Thursday)
 - Utypes in Action / VO-DML (Saturday)

Data models on going

- CTA (Cherenkov Telescopes Array) Provenance DM (Mireille Louys)
 - M. Louys, F. Bonnarel & J. Salgado helping CTA project in the design of the provenance & global DM
- Proposal of extension of SpectrumDM for spectropolarimetry (F.Bonnarel)
- Char/TAP (F. Bonnarel)
 - Show prototype on implementation of discovery TAP services using Characterization DM

Data models on going

- Planetary Science VO DM (P. LeSidaner on behalf of B. Cecconi)
 - Liaison group between IVOA/IPDA/Planetary data community
- ImageDM draft (D. Tody)
 - Presentation of current version of the draft and discussion
 - Asking for collaborators!

Utypes in Action / VO-DML

- Serialization of objects in a more descriptive and technical manner
- Presentation of prototypes making use of VO-DML
- Compromise to check/test/implement VO-DML concept as part of a future approach as the IVOA Data Model Language

PhotDM

- Finally.... I am glad to announce that PhotDM has passed the TCG comments period (only minor typos/comments)
- Document to be reviewed by Exec for possible approval
- PhotDM VO-DML enabled version.... ☹️

PhotDM

- Finally.... I am pleased to announce that PhotDM has passed the TCG comments period (only minor typos/comments)
- Document to be reviewed by Exec for possible approval

- PhotDM VO-DML enabled version.... ☹️
