

The IVOA Radio Interest Group

(Chair: M. Lacy,
Vice-Chair F.
Bonnarel)

- One dedicated session and one joint session with TDIG (reported by Mark Cresitello Dittmar)
- RIG session discussed Fast Radio Burst Data in the VO (Y. Grange), Mapping Single Dish datasets into ObsCore (A. Zanichelli), the status of the ObsCore extension for visibility data (F. Bonnarel) and the new JIVE ObsTAP service (M. Kettanis).
- Discussion topics:
 - how to deal with data on tape
 - unusual single dish observing patterns (cross, Lissajous) – use MOC for s_region?
 - observations with multiple spectral windows/frequency bands and/or multiple targets per observation.
 - How radio astronomers can specify resolving power.
 - Implementation and registration of a VO service.
