

Time Domain Interest Group

- **Chair:** Brent Miszalski; **Vice-Chair:** Mark Cresitello-Dittmar
- Current work
 - Discussions with Radio Astronomy Interest Group: how to best improve access to complex data formats containing time series
- Radio Astronomy data products most commonly contain time series components (e.g. within datacubes and radio transient surveys), but time series increasingly common elsewhere
- **See TDIG/RadioIG joint session on Wednesday 06:30 UTC**
- Future work
 - Continued discussions with Radio Astronomy Interest Group. Running meetings?
 - Prototype services to support complex time series products (e.g. at Data Central).
