Protocols due for DataCube Access IVOA priority – 1

- DataLink = attaching ressources and services to query reponse results and datasets
  - TCG review successfull
  - Reference implementation and client implementation
  - Review by Exec started on June the 8th
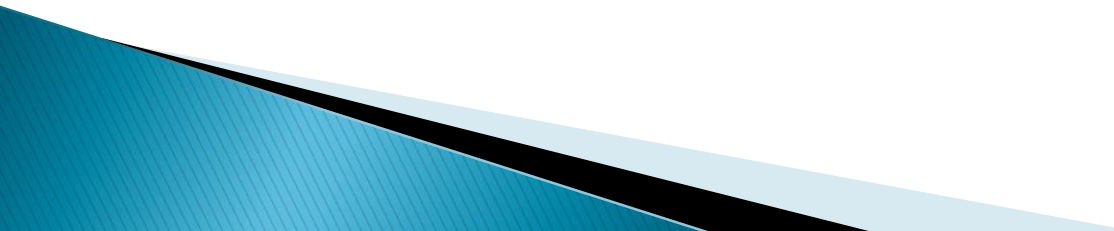

Protocols due for DataCube Access IVOA priority − 2

- SIAV2 = Parameter driven service for data discovery and description, ObsCore 1.1 metadata
  - A lot of comments during TCG review
  - Substantial changes to the document
  - Reference implementationand client implementation
  - Discussed changes to syntax to be adressed in version 2.1
 - TCG review continues with modified PR.

Protocols due for DataCube Access IVOA priority – 3

- **AccessData** = distant extraction / transformation of datasets
  - Work a little delayed by SIAV2 process
  - Discussion still active on syntax following Calgary compromise on Keeping the SIAV2 syntax, with addinional ucd, unit, xtype description in the descriptor.
  - Side meeting proposed with authors Wednesday afternoon.

TAP and ADQL

- Errata notes on TAP and ADQL. To be reviewed by TCG ?
- TAP 1.1 internal draft available since May
- ADQL 2.1 internal draft available since June

SimDAL

- Set up and discussed in Theory Interest group
- Now under review by DAL Working group

Sessions

- DAL I (Tuesday): TAP and ADQL
- DAL II (Thursday): SIAV2,AccessData and SimDAL
- DAL/DM (Thursday): Future of Cube discovery and access. WCS access issues. Relationship with ImageDm and STC2. Obscore 1.1
- Splinter meeting on AccessData (Wednesday ?)
