

# Aladin VO new features

The logo for ALADIN features the word "ALADIN" in a bold, black, sans-serif font. The text is superimposed on a stylized, multi-colored (red, blue, and purple) spiral or galaxy-like graphic. The spiral is composed of concentric, slightly irregular rings, and the entire graphic is surrounded by a field of small, scattered dots in red, blue, and purple, giving it a starry or nebular appearance.

### Astronomy Visualization Metadata Standard

1. Intended Scope of the AVM
2. Metadata Management
3. AVM Tagging Tool
4. CSV to AVM tagging script
5. Users Guide
6. AVM Adobe Metadata Panels
7. Examples of Tagged Images

### 1. Intended Scope of the AVM

The astronomical education and public outreach (EPO) community plays a key role in conveying the results of scientific research to the general public. A key product of EPO development is a variety of non-scientific public image resources, both derived from scientific observations and created as artistic visualizations of scientific results. This refers to general image formats such as JPEG, TIFF, PNG, GIF, not scientific FITS datasets. Such resources are currently scattered across the internet in a variety of galleries and archives, but are not searchable in any coherent or unified way.

Just as virtual observatory (VO) standards open up all data archives to a common query engine, the EPO community will benefit greatly from a similar mechanism for

available on official CDS web pages*

The logo for ALADiN features the word "ALADiN" in a bold, black, sans-serif font. The letters are partially overlaid by a thick, dark blue horizontal bar. Behind the text is a stylized, colorful graphic consisting of concentric, swirling bands in shades of red, purple, and blue, surrounded by a field of small, scattered dots in the same color palette.
