Validators Page Issues

Tom McGlynn and Mark Taylor

Missing Validators

- VOEvent, VOEventRegExt

- Data Models: SIMDAL, Photometry, Simulation, Characterization

- Validators for registry entries (e.g., HiPS but more generally for all services).

  - For sites which generate registry XML outside a queryable registry

- SSO, PDS, Credential Delegation

Updates needed/links missing

- DataLink

- Astropy cone validator link

- VODML
  - DataSet Metadata, Cube, STC

- CDS UWS Link

Reclassification

- Number of standards should probably be specified as Not Applicable
    - IVOA Document Standards
    - Vocabularies
    - UCD Maintenance
    - Resource Metadata

- Standards should be deleted from this document as obsolete
    - Web service basic profile
    - STC-S
    - SkyNode

Updated standards?

- Did validators get updated when standards were updated?
