

Abstract ID : 36

Wrapping up ADQL-2.1

Content

A brief overview of what have changed between the version 2.0 and 2.1 of the ADQL while starting the RFC period.

Preferred talk time

27th 06:00 UTC, but the 2 other slots would be fine

Primary author: MANTELET, Grégory (CDS - Observatoire astronomique de Strasbourg)

Presenter: MANTELET, Grégory (CDS - Observatoire astronomique de Strasbourg)

Track Classification: Data Access Layer

Comments:

If no time for this talk, I can still prepare the slides and publish them on the Interop's program page. Considering it is just to present a summary of changes, slides should be rather self-explanatory. And anyway, I don't really expect discussions on this.
