Closing Session: Semantics

Markus Demleitner, chair

Carlo Maria Zwölf, vice-chair

Vocabularies in the VO 2 is now REC – Thanks to all reviewers and contributors!

In The Session

- Vocabulary of data product types ("Find application to sent to"): An attempt at tree-ification

- Vocabulary of object types: SIMBAD's input

- How to program with vocabularies in python/astropy and Javascript

See the slides of details!

The Road Ahead

- New UCDs (skewness, kurtosis) – anything else for 1.5?

- Please review http://www.ivoa.net/rdf/refframe (for SimpleDALRegExt and Coords)

- Please review http://www.ivoa.net/rdf/product-type (also for SimpleDALRegExt and hopefully Obscore in the future)

- Please review http://www.ivoa.net/rdf/messenger (for VODataService)

And: If you're missing terms on any of https://ivoa.net/rdf, consider a VEP. semantics@ivoa.net is there to help you!
