Time Domain Interest Group
Closing Remarks

Topics to monitor
Areas where TDIG can contribute or provide support

- DataModel/Applications

  - Support implementation of Cube model family with emphasis on representation of Time Series

    - Candidates: Splat-VO - continue earlier work done using TimeSeries. Others?

- DAL

  - ConeSearch extension into time domain (roadmap project)

  - Updates to VOEvent: minor change from SSIG in progress

- Registry

  - "Finding TESS light curves in the VO" - illustrating that discovery of specific time domain data with current services is not exactly intuitive.

- Radio

  - Continued collaboration on discovery and access to Pulsar and FRB data.

- Semantics

  - Migration of data_product concept to a controlled vocabulary… representation of Time-based products: TimeSeries, LightCurves
