Registry Working Group summary
IVOA Interop May 2024 Sydney

- Try out OpenCADC's repo of OAI-PMH publishing service tooling and Docker at https://github.com/opencadc/reg .

- Discussion will continue on managing tablesets and relationships between them and services in the Registry. Renaud summarized and proposed an idea to help. Review the notes of the last running meeting as well as this Interop for more details. To be continued.

- Markus points out the utility of (e.g., global image discovery) and method for (rr. res_detail) adding data product type to the Registry. The Q&A came up with no blockers, just a few issues to resolve.

- Spring Cleaning is a good idea and there were a number of suggestions made for how to move forward with this.
