TAP

TAP

Are we there yet?

TAP

- Finished second RFC period

- Lots of good feedback

- Good Enough™

- Final edit

- Submission following discussion in DAL-2

SIAP

- SIAv1 is effectively complete and ready for retrospective approval

- First draft version SIAv2 specification has been finished.

- Much good work from core & extended author group.

- Early draft

- Uploaded to the TWiki and discussed in DAL-1

Keith Noddle

SSAP

- Plans to implement prototype servers/client containing photometric (as opposed to spectra) data

- Discussed in DAL-1

Footprint Services

- Slow but steady progress

- Discussed in DAL-1
