

Semantics WG — Nov-2023 — Closing

Main topics addressed

- ObsFacility vocabulary => IVOA Note + Name resolver + (almost) first draft vocabulary
- UCDFList RFM 1.6 => need to simply process + UCD as a IVOA vocabulary
- mapping VOResource to DCAT?
- Linked-Data in the VO: FAIR-IMPACT => project to make RDF Graph (Registry+Datacite+EPNcore+DataLink) with MASER project data.
- [SSIG] EPNcore lists in vocabularies
- [DCP] FAIR assessment => better vocabulary/URI management
- [Registry] implement URI for vocabularies? (improving search interfaces)
- [CSP] IHDEA alliance willing to use IVOA vocabulary as reference

Semantics WG — Nov-2023 — Closing Roadmap

- ObsFacility: propose draft vocabulary + publish IVOA note(s)
- EPNcore: Prepare lists of terms in vocabularies (directly RDF/XML).
- IHDEA: Coordination on helio reference frames and work on VEP.
- UCDFList RFM 1.6 : simplify process + UCD as a IVOA vocabulary
- Linked-data exploration : onto-portal prototype (UAT, DCAT, RDF Graph on small subset of Registry/epncore/datalink resources)
- Product-type vocabulary: still some work to do before we converge...
