

# Data Curation & Preservation

Françoise Genova, Alberto Accomazzi

Plenary 2

# DOIs

- Well attended session and lively discussion
  - Reference overview (Alberto)
  - Examples of implementation in different contexts
  - Introduction to the technical (Registry) discussion (Markus)
- A hot topic for data providers
- Data providers' responsibility to go for their DOIs
- Useful to hear about examples of implementation
- Maybe discussing lessons learnt from implementation at a next Interop would be useful. Will be proposed to IVOA membership.
- In project: White paper describing the landscape (AA/FG)

# RDA

- Presentation of RDA status and examples of established or possible liaisons (eg Provenance, Certification, Dynamic Data Citation, etc)
- It is really interesting to join
- Lots to learn from the WG/IG work, from participating in the work or proposing new Groups, and from informal interactions at the Plenaries
- Next Plenary
  - Tokyo, 1-3 March 2016
  - USA, September 2016
