# Feedback from Montréal FIM4R workshop and RDA Federated Identity Management IG

André Schaaff[1], Carlo-Maria Zwölf[2]

[1]*Centre de Données astronomiques de Strasbourg*

[2]Observatoire de Paris / LERMA

**IVOA, Santiago, 27-29/10/2017**

# FIM4R workshop in Montréal

- Remark: it was my first participation to FIM4R, I speak not *on behalf of...*

- FIM4R is a forum for communities to share challenges and ideas and to shape the future of Federated Identity Management for different research communities

# FIM4R workshop in Montréal (2)

- Group of Research Communities leveraging FIM
  - https://fim4r.org/
- FIM4R participants wrote an influential paper
  - https://fim4r.org/wp-content/uploads/2017/07/CERN-OPEN-2012-006-2.pdf
- Now they write an update

# RDA Federated Identity Management IG

- A session at RDA Montréal, chaired by Hannah Short (CERN) and Carlo Maria Zwölf (Paris Observatory) defining its role
  - The IG will be a discussion / exchange hub on test-bed solutions and technical solutions
  - Best practices developed by the wider community
  - Become a central point within the RDA for the discussion and consensus finding around the Authentication and Authorization issues

# Link between RDA FIM IG & FIM4R

- From all the gathered inputs, the FIM4R forum will produce a whitepaper for streamlining and enumerating the requirements

- This paper will be discussed at the RDA level for approval and will then become a basis to elaborate best practices and recommendations.

- => virtuous exchange

# ☐ On the IVOA side

- Interesting to follow this work in the frame of the GWS

- Comments ???
