

Closing Session: Semantics

Markus Demleitner, chair

Carlo Maria Zwölf, vice-chair

- VOUnits 1.1: Is % a unit? [We'd rather not, but we probably can't help it]
- Are our vocabularies FAIR? [Provenance-type links would be useful]
- New UCDs for 1.6 [do we need to tell apart pressure outside a telescope from pressure on a planetary surface?]
- Facility nomenclature [There is a prototype Rosetta stone!]

The Road Ahead

- VocInVO 2.1 RFC running [please review! It's not terribly much.]
- UCD list 1.5 TCG review imminent
- VOUnits 1.1 PR soon
- UCDDList 1.6: Cycle starting soon. Proposals for ambient conditions (and more)
- Reflecting UAT practices in VOResource 1.2
- Getting product-type ready for Datalink
- Facility nomenclature: towards a Note

And...

...if you're missing terms on any of <https://ivoa.net/rdf>, consider a VEP. semantics@ivoa.net is there to help you!
