

I VOA registry interfacing to GLU

An Aladin testbed
for I VOA registry.

Demonstration and remarks

Glu sites

Server selector

Choose an image server or a data server and fill in the associated form drawn below

Image servers:

- Aladin
- SkyView
- Others...
- VLA...
- Local

Data servers:

- VizieR Catalogs
- Surveys in VizieR
- Missions in VizieR
- Simbad
- NER
- Others..
- FoV

Aladin image database

Step 1: Specify a target/radius and press SUBMIT

Target:

Radius:

Step 2: load one or several images by list or tree

- ZMSS
 - J
 - H
 - K
- SERC
 - V
 - I
 - 521 11.4'x11.4'
 - 521-PLATE 6.3'x6.3'
 - S
- AAO
 - R

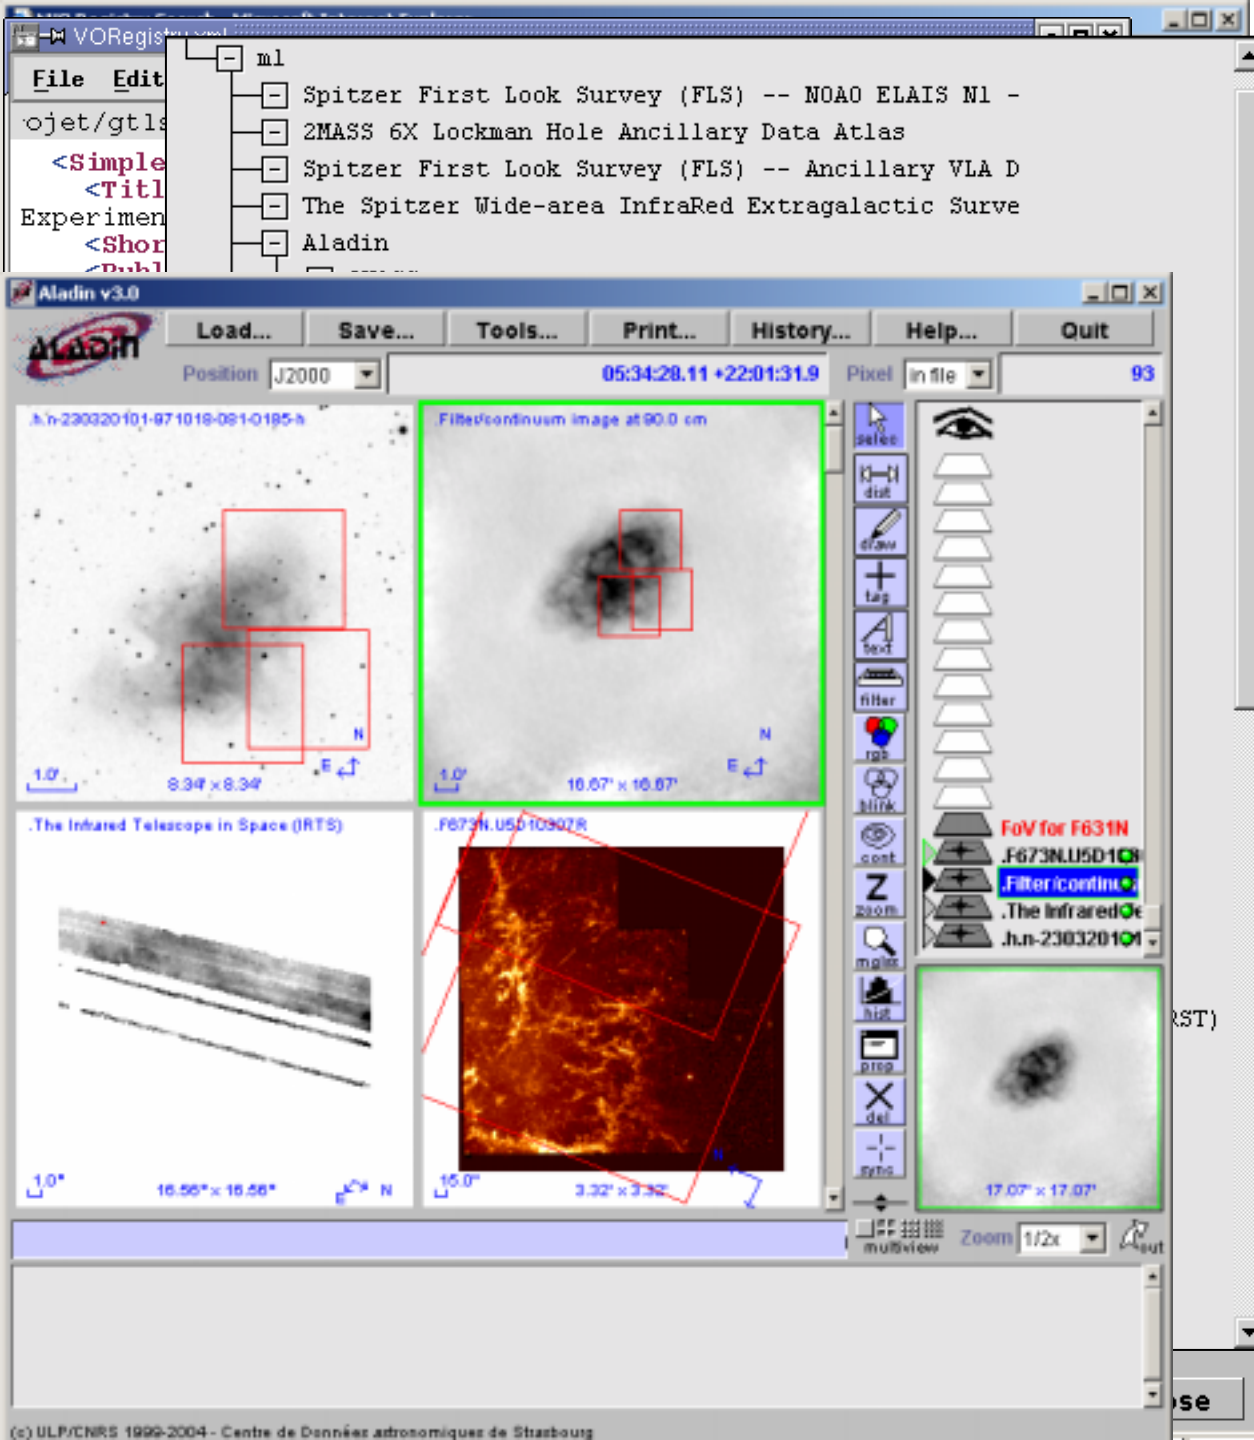

Tools: selec, prop, draw, text, tag, dist, filter, rgb, cont, hist, zoom, miss, del, pad

Layers: P.motions, I259/tyc2, Selected sou, FoV for 2MASS, RGB img, Plates, MAMA.RES, MAMA.S.SER, MAMA.I.SER

Zoom 1x

SUBMIT Data Tree Reset Clear Close

1. Harvesting from STScI

2. Conversion and filtering into a GLU dictionary

3. GLU site synchronization

4. New Aladin form managing these VO GLU records...

5...to produce general metadata trees

6... to choose and manipulate images and catalogs..

Positive points

- Quick development (*2 days*).
- Based on simple technologies...
(*HTTP, XML, ASCII*)
- ...and thanks to VOTable, SIA, CONE search and obviously FITS.

Could be improved

- **Need curation** (*mistakes, multiple definitions, NOT PROVIDED, copy of copy of copy, truncatures...*)
- **A standard is missing** : describing available table lists for a target (*the "SIA" for tables*)
- Perhaps a **too simple structure** to describe the reality (*flat view, no mirror, no yet real access method specification*)

The current VO registry content :
=> How to manage VizieR with a flat structure?

Open questions

- **How to overstep the flat view ?**
- **How to manage the registry curation ?**
- **How to fully describe the access mode ?**
(HTTP params, WS methods,...)
- **What about a standard describing tables lists.**
- **What will be real life after prototyping ?**
(in fact many resources are not available)
- **Is OAI really adapted ?** *(perhaps a little bit heavy for a simple GET method)*
