IVOA VOQL

Plenary session

Moscow Interop meeting

Sep 2006

IVOA VOQL Group – Pedro Osuna

VOQL Group Plans

- Change of structure:
  - P. Osuna   Chair
  - Y. Shirasaki   Vice-chair

Thanks to Maria and Yuji for their excellent work

- Immediate plans:
  - "Refurbishing" of ADQL/SkyNode documents:
    - Separate clearly language from access
    - Attend all needs from the different branches within VO
- Discussions already taken place with many interested parties, and needs taken note

VOQL Group plans

- Too short reaction time to start working on the technical details

- Creation of a reduced "Experts" group (VOQL-TEG) to deal with technical details

- VOQL-TEG active group. Will meet regularly and feed results for discussion to the voql@ivoa.net so everyone can have their voice heard

VOQL Milestones

- Next IVOA interop in China will be a major milestone for VOQL group:
    - Revised ADQL doc
    - New TAP doc
    - Revised SkyNode doc
- More plans will result from subsequent job. Too premature to predict during this meeting
