# Publishing Data in the VO

- ▶ A reminder that all InterOp participants are invited to provide input

The screenshot shows a TWiki page with a search bar at the top right containing 'Jump' and 'Search'. The breadcrumb trail is 'TWiki > IVOA Web > PublishingInTheVONew (2013-05-12, MarkTaylor)'. There are 'Edit' and 'Attach' buttons. The main heading is 'Publishing Data into the VO'. Below it is a table of contents with four items: '0. Introduction', '1. Questions & Answers about what type of data to be published into the VO', '2. Registry for VO Data Service Discovery', and '4. Developer's corner : other useful software tools and libraries for VO development'. The '0. Introduction' section is expanded, showing text about the page's purpose and a list of options for publishing data.

### 0. Introduction

The purpose of this page is to provide practical information about how to publish you data holdings into the VO. The content of this page is user contributed by members of the IVOA community and its content will evolve as IVOA standards and implementations evolve.

Depending of your needs and your technical experience, there are several ways to publish you data into the VO:

- if you have very little technical expertise, you might want to contact your national VO projects who might already have the infrastructure to host your data and make it available to the VO. See the [list of national VO projects](#) and the [selection of open data centers](#) offering publication as a service.
