Main Page

This wiki is a testing ground for collaborative astronomy vocabulary development, run by [Norman Gray](#), [Stuart Chalmers](#) and [Iadh Ounis](#), originally as part of the Explicator project (see <http://explicator.dcs.gla.ac.uk/>).

If you have any queries about using this site, or would like to add your own astronomy vocabulary, please contact us.

How to use this site? [\[edit\]](#)

This site allows you to publish and then work together on developing a vocabulary. What would this look like? A good place to start is just to dive straight in and look at the currently available vocabularies:

[Currently hosted astronomy vocabularies](#)

Why use this site? [\[edit\]](#)

A good question! There are many examples of vocabularies already in use (e.g.

help

- [Help](#)

- At this point Franck will give a hollow laugh – I swore blind, at the last interop, that this would all work sweetly Real Soon Now.
- What with contracts, funding, personnel changes ... it hasn't quite happened yet.
- *blush*

Greetings from sunny Glasgow
