VO Services Validation from Euro-VO Registry

Christophe Arviset, Menelaus Perdikeas
ESAC Science Data Centre,

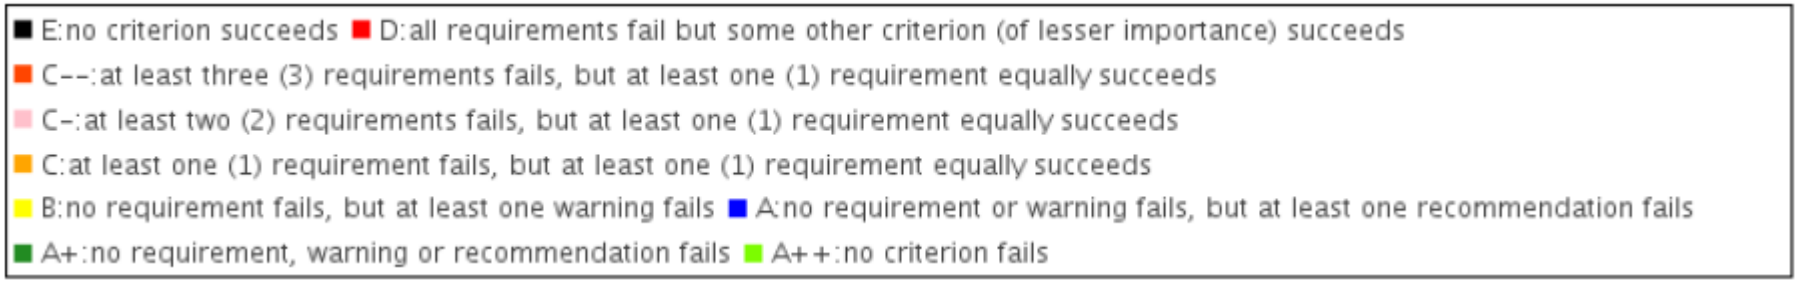
IVOA interop, Sydney, 01/11/2015

Issue/Revision: 1.0
Reference: VO Services Validation
Status: Issued

VO Services compliancy tests

1. Services compliancy tests for:
    a. SIAP 1.0, SSAP 1.0, SCS 1.0, TAP 1.0 (taplint Mark Taylor)

VO Services compliancy results



1. Results could be grouped and simplified

2. GREEN (A++, A+, A, B)
    a. All requirements compliant

3. ORANGE (C, C-, C--)
    a. Between 1 and 3 requirements non compliant

4. RED (C--, D, E)
    a. More than 3 requirements non compliant

VO Services non compliancy

1. Some requirements are systematically non compliant in almost all VO services supposed to implement them

2. Reasons for non compliancy:

    1. Service validator is wrong ?

    2. Requirement not clear and therefore wrongly implemented (too strictly in the validator and too loosely in the service) ?

    3. “Wrong” requirement, conscientiously not implemented ?

Non compliant requirement failing in 100% of the services

Failing Validation Criteria

Validation criteria whose failure percentage (over all time) is in the following range [100%~100%].

Report run time: 2015-10-22T01-25-14.

service type	criterion code	# successes	# failures	% failures
sia:SimpleImageAccess	4.2.4.b.iii	0	496	100.00
ssa:SimpleSpectralAccess	4.2.5.11n	0	117	100.00
ssa:SimpleSpectralAccess	4.2.5.11q	0	117	100.00

See more details

Non compliant requirement failing in >90% of the services

Failing Validation Criteria

Validation criteria whose failure percentage (over all time) is in the following range [90%~100%).

Report run time: 2015-10-22T01-25-24.

service type	criterion code	# successes	# failures	% failures
cs:ConeSearch	2.3b	1375	37239	96.44
sia:SimpleImageAccess	.metd.xsd	49	447	90.12
sia:SimpleImageAccess	.effc.xsd	49	447	90.12
ssa:SimpleSpectralAccess	4.2.5.6c	3	114	97.44
ssa:SimpleSpectralAccess	4.2.5.11g	4	113	96.58
ssa:SimpleSpectralAccess	4.2.3.1	4	113	96.58
ssa:SimpleSpectralAccess	4.2.5.11p	4	113	96.58
ssa:SimpleSpectralAccess	4.2.5.11h	6	111	94.87
ssa:SimpleSpectralAccess	4.2.5.6b	10	107	91.45
tr:TableAccess	W_UNSC	3	79	96.34

How to improve the VO services compliancy – 1 ?

Reasons for non compliancy:

1. Service validator is wrong ?
   - ✓ Fix the service validator

2. Requirement not clear and therefore wrongly implemented (too strictly in the validator and too loosely in the service) ?
   - ✓ Update Standard with ERRATA and/or update service validators
   - ✓ Need to inform service providers for updating their service

3. “Wrong” requirement, conscientiously not implemented ?
   - ✓ Update Standard with ERRATA
   - ✓ Update service validators (downgrade REQ -> REC/WARNING/EXTRA?)
   - ✓ Services will then become compliant

How to improve the VO services compliancy – 2 ?

Classifying Services Compliancy

1. GREEN (A++, A+, A, B), all requirements compliant
   - ✓ Nothing to do (congrats to service provider ;-))

2. ORANGE (C, C-, C--), between 1 and 3 requirements non compliant
   - ✓ Contact service provider with non compliant requirements

3. RED (C--, D, E), more than 3 requirements non compliant
   - ✓ Contact service provider with non compliant requirements
   - ✓ If not improvement
     - – Make service inactive ? Remove the service ?
