Ref. Implementation 1

The Astrogrid Security Facade <http://software.astrogrid.org/doc/security/> implements all aspects of the SSO and the Delegation Protocol as a java jar file, which contains a servlet for the CDP, and the latest version is downloadable from <http://deployer.astrogrid.org/RELEASE/latest.html> at the bottom of the page. The AstroGrid DSA and CEA servers use this implementation to do the CDP from the VODesktop to allow secure access to the astrogrid VOspace service.

Ref. Implementation 2

Recommendations to EXEC	Credential Delegation Protocol has gone through the standard recommendation process and has received almost unanimous approval, so the TCG recommends the EXEC to approve it as an IVOA Standard.
