Ref. Implementations	There are two interoperating implementations of the entire SAMP standard, by different authors, in different languages, including the new SAMP_HUB feature:
	  * SAMPy 1.2.0 (Python)
	  * JSAMP 1.1 (Java)

Validation Suite	JSAMP also includes a validation suite which performs validation of nearly all aspects of the standard. SAMPy and JSAMP both pass these validation tests.

Recommendations to EXEC	SAMP v1.2 is a minor revision of the first SAMP recommendation v1.11, without unresolved controversies within the Apps/SAMP community. There has been unanimous approvals from all TCG members. There are already existing implementations. So we recommend the IVOA Exec to approve SAMP 1.2 as an IVOA Recommendation.
