Ref. Implementation 1 IASD, NIST, CIELO, CHIANTI, STSci, ALMA (observational services)

Ref. Implementation 2 LERMA (theoretical services)

Recommendations to EXEC	Note that SLAP 1.0 and SSLDM 1.0 are going together through the REC process. Both have gone through RFC and TCG. SLAP has received approval from all TCG members. It includes the reference to the IVOA Architecture, There have been various reference implementations, making use of both SSLDM and SLAP standards, and they are accessible from existing VO Tools. So we recommend the IVOA Exec to approve SLAP as an IVOA Recommendation.
