Applications Working Group Charge

Tom McGlynn, Chair

Mark Taylor, Vice-Chair

May 17, 2010

Application demonstrations

- Two sessions for web-based and client-based applications
  - How did VO standards help? Hinder?
  - Are there additional areas where standards would be useful?
- Links to applications from the AppsWG pages

Outside the box.

Session explicitly looking at non-VO, non-astronomy tools, services, ...

- Resources we should be re-using
- New areas we should be considering
- Different ways to do development of standards and applications
- A few demos and then discussion

Feedback from developers to IVOA

- What works
- What causes problems
  - In standards   ->   revisions/clarifications
  - Implementations   ->   verification
  - Capacity
- Validation and Verification Sessions
- More structured role for Apps?
