

Data Curation and Preservation IG

Françoise Genova

- One session common with Semantics
- DataCP talks in that session
 - RDA status (F. Genova)
 - Lots of interesting things going on there
 - Good to join, to choose WGs and IGs of interest and to send people to attend Plenaries to follow what is happening
 - First « products »
 - Astronomy IG?
 - Checking time in images (S. Derriere)
 - Also the usage of ObsCore in the context of « long tail data » associated to publications: G. Landais' talk in Apps 1

- Very few talks proposed (all by CDS) although several hot topics, e.g.
 - Data citation
 - Certification of data repositories and services
- Joining the discussions in RDA could be of interest to mobilize the community on this kind of topics (Certification taken as an example in my RDA presentation)
