Grid and Web Services Working Group

Plenary session

Feedback from the sessions and other discussions...

VOSpace 2.0

- Following the last feedbacks from the implementations & the discussion

    - minor points to clear and to agree but non blocking

        - example : timestamp *ivo://ivoa.net/ vospace/core#date* too vague

- Roadmap : will be finalised via mails and the document will be updated and available for the RFC in November

Scientific Workflows

- IVOA Note draft plublished before the first session

  - A few comments and inputs via mails

  - Presentation and discussion during the session

- Roadmap :

  - update the Note to a final 1.0 release

  - feedback from ADASS BoF to workflow@ivoa.net

UWS

- UWS 1.0 to UWS 1.1 ?

  - No consensus on different points (example : removing of the first phases of a job submission)

  - What could be done (possible Roadmap)

    - Quick update of the 1.0 to a 1.1 version backwards compatible (clear what is ambigous to help implementers + minor changes)

    - Open the discussions for a version 2.0

Around UWS

- A grammar for describing parameters within the VO should be available as a Note for the next Interop

- Roadmap :

  - Note for Mai 2012 interop & possible WD for the following interop

SSO

- Implementation in the VAO

REST Profile

- No time to discuss it during the sessions

- But the document is available

- Roadmap : cleaning of the document for the next interop, discussion on the grid mailing list

Thanks...

- to all the contributors (on site and via mails & Skype)
