Implementation Special Session (1)

- Proposed by the TCG
- People are interested: 7 talks proposed
- The aim was generally understood
- Different types of contributions can fit, from a global discipline point of view (VAMDC), to a synthesis on a topic (Theory, SED), to a set of contributions around a 'Hot' topic (TAP)

Implementation Special Session (2)

- A balance has to be found with the WG meetings which should also care about implementation feedback
- A good topic to share with the whole audience
- Follow-up technical discussion cannot be tackled in the plenery session framework

- Porposal: go on with this type of session, the best 'how to' to be discussed within TCG
