The fundamental question we (the IVOA) should always be asking ourselves:

The fundamental question we (the IVOA) should always be asking ourselves:

What do the scientists want?

So that message was reasonably clear.

Why can't they have one?

Some metadata that should be machine-accessible are not.

Solution?

Make these metadata available

ktn@roe.ac.uk

Conclusion:

- VOTable needs to include extra metadata
- DAL services (starting with Cone Search) that wish to play in this game need to supply the missing metadata within the VOTables they return
- Advertise this by announcing a new capability (Photometry - TBD)
- *No standards to be harmed in the making of these changes*
